EXPERIENCE

Remotebricks Pvt Ltd â Internship (6 mos)

PROJECTS

Bugnova | NESTJS, AWS (Remotebricks)

Built and led the backend development of Bugnova, a modern bug-tracking and issue-management platform. Developed and implemented scalable services using NestJS, AWS for authentication, database architecture, and real-time updates. Led a small engineering team, drove key architectural decisions, and collaborated closely with frontend and product teams to deliver a stable, production-ready backend.

Funbrain | MERN STACK

Developed a comprehensive MERN stack educational platform for children ages 3-13+ featuring interactive drawing, videos, music, and quizzes. Implemented secure user authentication with JWT tokens, advanced search functionality with real-time filtering by category, difficulty, and age groups. Built responsive UI components using React.js with parental control features for content monitoring. Created RESTful APIs with Express.js, MongoDB integration, and comprehensive security measures including rate limiting and NoSQL injection prevention. Integrated multimedia content management with audio players, drawing tool. The platform provides a safe, engaging learning environment.

Portfolio | MERN

Structure and Navigation: The portfolio has a clean header with navigation links for Portfolio, Services, Experience, Projects, and Features "Contact Me" button in the header for easy access.

Includes well-organized footer with media links and important pages like FAQ, Services, Privacy Policy
